

BRUSH CUTTER

Extreme Duty Open Front - High Flow

The Open Front Cutter is an extremely aggressive high flow units! The durable push bar keeps the trees off the deck. Requiring 27-45 GPMs, this bi-directional cutter can cut up to 8" trees. The hydraulic motor drives a 3.5" shaft that is housed in 2 massive bearings packed in grease, and makes this commercial grade cutter very reliable.

Features include:

- 3.5" drive shaft
- 4 double edged blades
- One piece 3/4" thick blade carrier
- Very quiet and smooth running
- Bearing seal protection kit under deck
- Cut up to 8" material
- Rear chain curtain controls debris discharge
- 1 year parts and labor warranty
- LIFETIME warranty against breakage on drive spindle

NEW... extra bracing under deck!

BRUSH CUTTER

Extreme Duty Open Front - Standard Flow

The Open Front Cutter is an extremely aggressive low flow cutter that will outperform most high flow units!

The durable push bar keeps the trees off the deck. Requiring only 16 GPMs, this bi-directional cutter can cut up to

6" trees. The hydraulic motor drives a 3.5"

shaft that is housed in 2 massive bearings packed in grease, and makes this commercial grade cutter very reliable.

Never before has this type of cutter been available for a low flow skid steer. Optional high flow motors for 27-45 GPM range are available for both models.

Features include:

- 3.5" drive shaft
- 4 double edged blades
- One piece 3/4" thick blade carrier
- Very quiet and smooth running
- Bearing seal protection kit under deck
- Cut up to 6" material
- Rear chain curtain controls debris discharge
- 1 year parts and labor warranty
- LIFETIME warranty against breakage on drive spindle

NEW... extra bracing under deck!
